SKILLS

- C#, Blazor, ASP.NET Core
- SQLite, Entity Framework
- HTML, CSS, Javascript
- React, Tailwind, Bootstrap
- Sass
- Linux
- Git
- Claude code

PROFILE

Currently studying Newton's 2-year program in .NET Software Development and looking for internship (LIA) 2026!

I have some prior experience in web development and computer science in general from the Front End course I finished last year, as well as from Harvard University's online course "CS50".

I am very curious about open source as well as DevOps tools like Docker and Kubernetes, and in my spare time I have started a homelab project where I self-host some services for my home network (with the ambition to learn more about linux, bash scripting, networks etc).

Let's get in touch!
